BOOST MODE

DESCRIPTION

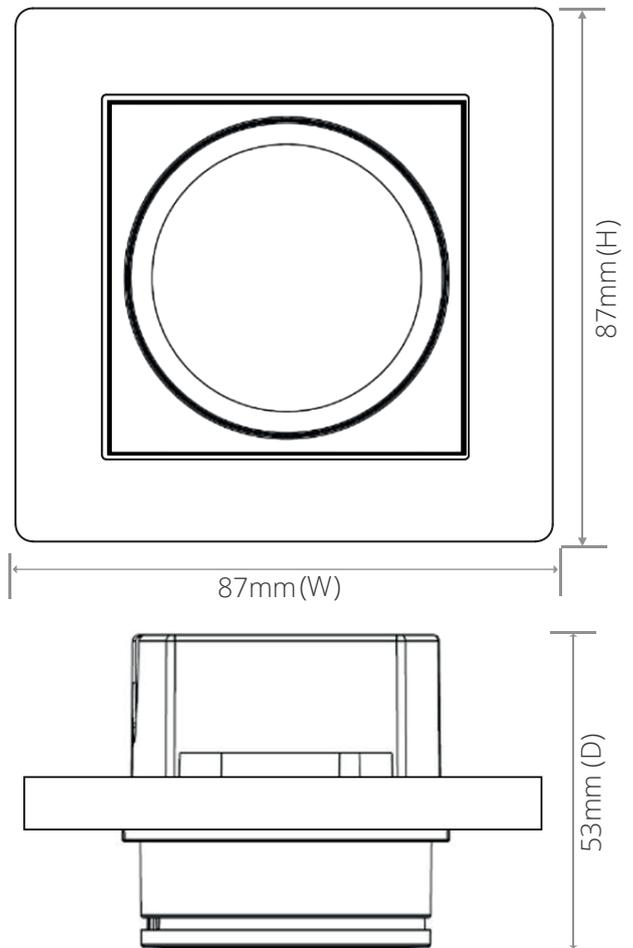

The easiest and most effective way to make an energy efficient electric heating installation. This range is an affordable and intuitive entry into smart control for your electric heating. The 'OLED' model features **Bluetooth 4.2**, an easy to use dial, and a fantastic OLED display.

It has the capability to set 24 hour / 7 day schedules for the built-in configurable eco/auto mode, hourly boost mode, monitor energy consumption, set maximum and minimum temperature limits, control underfloor heating, can pair with your smartphone via Bluetooth and be controlled through the EcoControl app, and also features display locking for spaces where tampering may occur.

The OLED display looks sleek and works fantastically, allowing you to easily change the configuration of the device and see what changes are being made right from the device. Included in the package is a single plain fascia for installation.

This unit comes with a 2 year warranty.
