SLIM DESIGN

DESCRIPTION

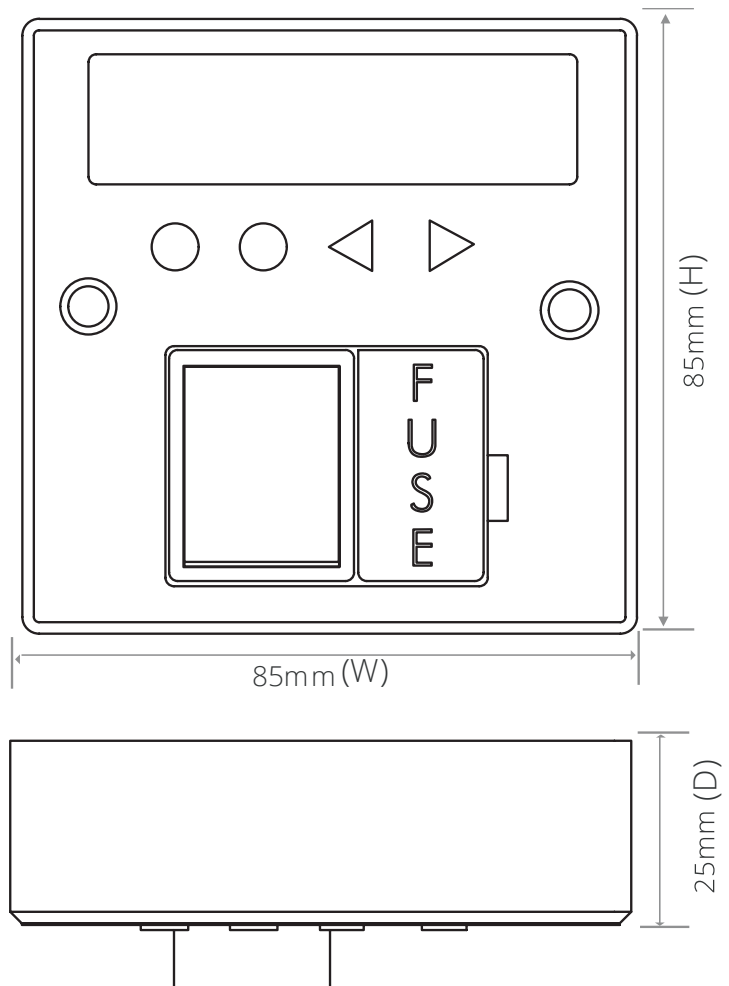

The Heat Matrix HM63FST7 Combined Timer & Fused Spur Switch is a compact and subtle control panel ideal for controlling towel rails, panel heaters, immersion heaters and fan heaters.

It is simple to use and has many features such as day, 5-day and 7-day programming, boost control, 700 hours of battery backup memory and 28 on/off settings for you to choose from.

Fits a standard flush or surface mount BS wall box min. 25mm deep. Typical applications such as immersion heaters, room heaters, towel rails and selected lighting applications.

This unit comes with a 2 year warranty.
