Ecodesign Compliant www.lot20.co.uk
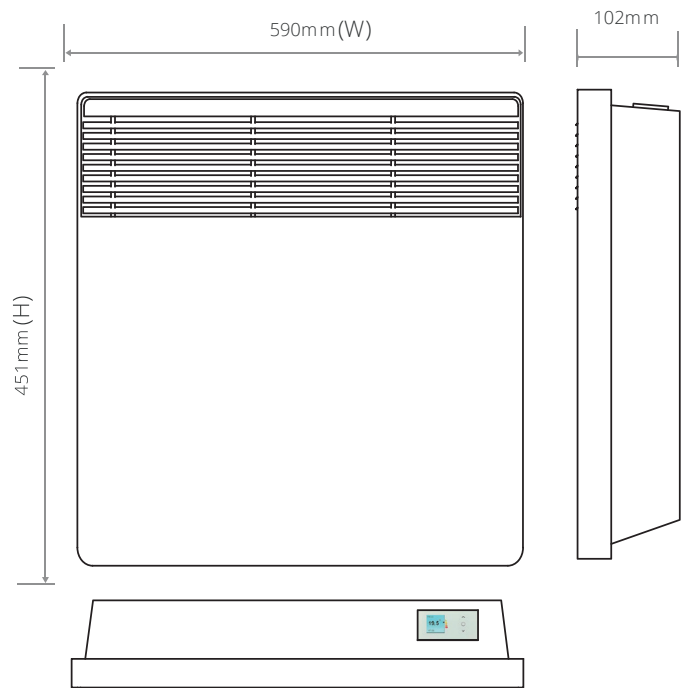

DESCRIPTION

The HMPH47ErP is a slim and compact heater suitable for a wide range of applications. The upper front panel features air outlet wings which allows powerful heat to be dispensed throughout the space.

It features an on-board LCD display and a control panle with simple, user-friendly controls. The control panel allows you to change the temperature as well as the active mode. Energy usage data is displayed at all times.

The steel shell is robust and hard wearing. The white coat allows it to blend into the background and the silent design keeps the model discreet. The design of the product keeps the heating element safe and secure. IP24 rated, meaning that it is suitable for bathroom applications.

This unit comes with a 2 year warranty.

DIMENSIONS (1500W)

590mm (W)

102mm

451mm (H)
